

Name: Roberto Reynoso

Project Title: Reunion

Team Members: Ammon Nelson

Overall Status: Finished proposal and started learning Flutter and Dart.

- **Number of hours worked since last update: 6**
- **Number of hours worked on the project thus far: 9**
- **Total number of hours anticipated for completion: 140+**

Accomplishments:

Finished proposal, Installed all the needed technologies so far for where we are in the project.

Challenges:

We ended up settling on using different technologies, than Node JS and react. We are now using flutter and dart to make this project.

The challenge will be to learn these new technologies and make a easy to follow wireframe that we can work off of.

Plans / Goals for next week:

Work on making a wireframe we can work off of and continue putting time into learning flutter and dart.

Accountability plan: (What is your plan to keep yourself honest and follow through with the goals that you have outlined?)

I have a great partner for this project and we are both pushing eachother to get all the work that is needed to accomplish the tasks ahead.

Other comments:

This project may be something really awesome.
