Accomplishments:

We had a meet and talked about the different ideas we had, and concluded on what we may pursue, also we did some research on some of the technologies we might need.

Challenges:

This project would require for us, to get familiar with new technologies. Like *React Node-Js Java-script ect.*

Plans / Goals for next week:

Writting up our proposal and turning it in and potentially making a wire frame/plan about how to accomplish developing this application.

Accountability plan: (What is your plan to keep yourself honest and follow through with the goals that you have outlined?)

My team-mate is one, I hate letting people down, so i'll work hard and get it done.

I am also very much motivated on the idea we have.
